Leading Aboveground Storage Solutions Company Inks Deal With Tank Manufacturer in the United Kingdom

*Agreement expands US company's leadership position in worldwide
flammable and combustible liquid storage market*

Denair, CA – June 8, 2004 – ConVault Intl., Ltd., the leading protected aboveground storage solutions company, announced today that Terence Barker Ltd will manufacture ConVault products in Essex for sales in the United Kingdom by South Midland Installations, Ltd, and neighboring countries. The agreement allows the production and service of ConVault licensed tanks in the United Kingdom.

Terence Barker Ltd is a member of APEA, and is an old and well-respected company in the United Kingdom. Terence Barker Ltd serves to expand the ConVault international picture, which now has a manufacturing or marketing presence in nearly every industrialized region of the globe. Terence Barker Ltd's excellent reputation in the industry makes it the logical choice for ConVault.

"ConVault's reputation for innovative and environmentally sound products made it the perfect fit for Terence Barker Ltd's expanding environmental business," commented Terence Barker, president of Terence Barker Ltd. "The addition of ConVault tanks to our existing business allows us to offer environmental solutions to meet the needs of companies from small independents to major corporations."

About Terence Barker Tanks, Ltd.

Terence Barker Ltd was founded in 1962 and is one of the leading storage tank manufacturers in the UK. They operate from a modern manufacturing facility based on an 18-acre site at Braintree in Essex.

Terence Barker Ltd is a member of APEA, the Association of Petroleum & Explosives Administration and was a member of the steering committee of CIRIA, which was created to advise Government Ministers on the safe storage and handling of petroleum products. All the service engineers and installers are OFTEC registered, an organization recognized by the Government Environment Agency. Finally, twice the company has been granted 'Investors in People' recognition.

About Convault Intl., Ltd.

ConVault, Inc., the pioneer of protected aboveground storage tanks originated in California in 1986 when Thomas R. Lindquist devised a radical new method for aboveground storage of gasoline and diesel in a safe, dependable, and esthetically pleasing manner. The ConVault protected aboveground storage technology was designed to address the concerns of environmental and fire safety officials, incorporating many of their requests and suggestions. The design has been dramatically proven with the product performing well in numerous natural disasters.

ConVault has an impeccable record, with over 28,000 protected tanks currently in service at extremely diverse locations in at least 24 countries without a reported system failure. The list of owners includes all levels of USA and Canadian government and many Fortune 500 companies. Licensees manufacture the ConVault tank in Australia, California, Colorado, Connecticut, Florida, Georgia, Japan, Ohio, Pennsylvania, Poland, Slovakia, Texas, Utah, and now in the United Kingdom.
